

The Web Portal for Parents www.a4k.de

Active for Children www.a4k.de is the new portal for parents presented in many languages and is meant for all those people who want to get informed or to exchange views with regard to any issue related to raising and educating children.

www.a4k.de is unique in Europe because parents of different native languages can discuss with each other in their own language and get expert advice.

Forum for parents

Deutsch, Türkçe, العربية, Русский, Polski, Français, English

In the Forum, parents discuss with each other in their respective native language.

It is often relieving to hear that other parents face the same problems as you. Maybe they have tried something which may be helpful to you, too? Or you may want to submit your own question or view or give valuable advice to other parents?

The Association for a New Education will collect frequently asked questions and point to answers given in the parents' letters or by experts which could be helpful to you.

Every month a new subject

Regarding family and upbringing issues

Don't you feel the same? In everyday life with children, there is always a subject parents are interested in. ANE will present these typical subjects in monthly alternation. Whoever has time and is interested may join the discussion in the Forum or read what others have to say about the respective subject.

Your opinion is important! Please join in!

Opinion poll

In the monthly poll, a typical issue parents are facing in their everyday life with their children is presented as question of the month. How do you answer this question? Just click on the answer most appropriate for you. You may then compare your vote with those of other parents.
